Press Release

Orgacure's technology receives patent in the United States of America

A patent which takes on the US\$ 1 trillion food waste challenge

Rotterdam, Netherlands, March 14, 2017: Orgacure B.V., an agriculture and food science technology company with focus on food waste solutions for farmers, processors and supermarkets, announces today that the United States Patent and Trademark Office (USPTO) has issued US Patent 9,591,860 covering a preservative composition and solution which does not impart an unpleasant taste or after taste on treated fruit and vegetable. Orgacure has exclusive rights to the patented technology and has a variety of solutions, incorporating the patented technology, in development and on the market.

Preservative composition and solution (PCAS) enables farmers, food processors and supermarkets to offer whole and fresh-cut fruits and vegetables with optimal microbial and 'cosmetic' shelflife resulting in safer and fully native tasting fresh produce quality at lower costs and reduced food waste. Orgacure's unique Allin-One mode of action covers effective removal of bacteria and precise delay of browning on fruits and vegetables treated with PCAS technology. Bottlenecks in fresh fruits and vegetables processing such as desinfection and anti-browning treatment cycles are fixed with Orgacure's PCAS technology allowing for faster and more economic and eco-friendly food manufacturing.

"Our business is the counter-thesis to big agro MAKING more food, saying 'to feed the world' while Orgacure is USING more (food) for the good of the environment." says Roger Bierwas, CEO of Orgacure. "This patent is an important step towards lower amounts of food waste in the world. We are confident that Orgacure's PCAS technology combined with game changing applications, of which some are yet to come, will create a long-term market impact."

About Orgacure: Orgacure was founded in 2012 by Roger Bierwas and co-founders Jan Paul Schirmer and Julian Willem Vrolijk. Roger developed the Orgacure technology and brand with the

striking food waste badge carrying the companies 'no waste' motto to spark the dialogue. Orgacure's vision is to turn the world's food waste worth US\$ 1 trillion, into business and good enviroment. Food Waste is one of the earth's largest carbon dioxide sources and a cutback in greenhouse gases and the preservation of water resources improves our habitat.
